

Away We Go

Chris Trapper

I dreamed there was a sea
surrounding you and me
We took a week long trip
out on a tourist ship
With flowers on your hat
My jacket's striped and black
Gently I kissed your neck
down on the server's deck

Wondering how far we are from home
Feeling like it's anywhere that both of us go
and away we both of us go
and away we go

I dreamed there was a sky
surrounding you and I

We took a tiny plane
propellers fought the rain
So then the plane went down
This is our island now
Living on coconuts
Sea breeze through wicker huts

I dreamed there was a place
in someone else's face
Where I could get away
with no ticket, no suitcase
We're under covers now
It's raining out and how
we love to stay in bed
take time and not forget-->
