

Everything Was Possible

Chris Trapper

Yes we had some summertime
Goes through my mind all the time
The sun must get tired of shinin' down
Don't long for what is gone
'Cause you're gone too before too long
So sing loudly the beautiful song you've been humming

Around you, everything was possible
Around you, everything was true
Around you, everything was possible too
Everything was possible with you

You can't catch a cold from the cold
You can't make yourself young when you're old
Despite all the lies that you're buying
Don't long for what is gone
Cause you're gone too before too long
So sing loudly the beautiful song you've been humming

Around you, everything was possible

Around you, everything was true
Around you, everything was possible too
Everything was possible with you

Cause you're gone too before too long
So sing loudly the beautiful song you've been humming
Around you, everything was possible
Around you, everything was true
Around you, everything was possible too
Everything was possible with you, yeah
(oh oh oh oh oh oh oh)

Everything was possible with you
(oh oh oh oh oh oh oh)
Everything was possible
(oh oh oh oh oh oh oh)
Everything was possible with you
(oh oh oh oh oh oh oh)
Everything was possible
(oh oh oh oh oh oh oh)
