

# The Rain

Chris Webby

We've been in the rain  
We've been on the mountains  
We've been round the fire  
And fancy hotels  
Drank water from the well  
(2x)

Uh I'm stepping in this game and paying dues  
Building a reputation now we making major moves  
And now it's moving, how it's moving anyway I choose  
And I've been working way to hard to just not make it through  
You talk about me, prepare for what I say to you  
Cause I'm a man and I will stand by what I say and do  
There's a lot of ups and downs within this game of life  
For every hater there's a girl that wants to stay the night  
And now I got myself a taste of the fame,  
I'm addicted I've got nothing else to chase  
I kill it on the stage but still I miss the days  
Of chilling in the crowd like a normal kid my age  
But still I got this paper and still I got my pencil  
And the craziest part is I haven't hit my potential  
The life I live is stressful, everyday suspenseful  
Grinding every minute of my life to be successful

We've been in the rain  
We've been on the mountains  
We've been round the fire  
And fancy hotels  
Drank water from the well

Uh I'm trying to make it with my sanity  
Moving from the underground roots up to the canopy  
Do it how I do it I just hope they understanding me  
Trying to make it right with every member of my family  
I know I was the mess up but now Chris stepped up  
And took hold of what I always wanted from the setup  
Now when people mention me they saying I'm the next up  
It's been a long time since that A.D.D. checkup  
The underclassman's graduated, top of the class  
Now when I walk around town people nod when they pass  
I'm just a kid who messed his life up and put it back together  
A kid who hit the bottom and came back stronger than ever  
I've been jerked around, stolen from, told I would fail  
But now the numbers going up on every check in the mail  
And if they not feeling it, ill spit it in brail  
Hating on me gets you know where keep on chasing your tail

We've been in the rain  
We've been on the mountains  
We've been round the fire  
And fancy hotels  
Drank water from the well  
(2x)

You think the life I live is wonderful  
Let me give you the flipside  
Try to go with the flow and get caught up in the riptide

Everyday it's studio or driving to a show  
And no I'm not complaining I'm just letting people know  
There's a lot of hard work that goes right into the grind  
Especially without being signed and working overtime  
Now every time I meet a girl there is a difference  
Cause all they want is Webby without even meeting Christian  
They just want to fuck, maybe roll an I  
And go back in the morning with a story to tell  
And though it sounds great, the side of it you don't see  
Is that the end of the day you're still lonely.  
The fans show me love and I love my ninjas back  
They hold me down and I'm forever thankful of that  
And I wont let you down you have my word on that  
Cause I'm here for good the best of the burbs is back

We've been in the rain  
We've been on the mountains  
We've been round the fire  
And fancy hotels  
Drank water from the well  
(2x)
