Yo

I know nobody's leaving voicemails no more but um
I just wanna let you know that I been thinking about you
Um yeah, it's crazy right?

We started talkin'
Back when the leaves was fallin'
Back when I had em callin'
I met you when you was ballin'
Sometimes that money hit but sometimes we was out here starvin'
Back when we used to whip in the Acura like a 'rari
Did some things I ain't proud of
Did some things made you doubt us
I thought that making dolla's would keep me from being caught up
It's a big jump from where we came to where we are
I never thought your faith in me would get me this far
Oh

Said I never thought it'd get me this far, far
But to look back and think where we are

We was just slow grindin', yeah
Better when it's slow you gotta know you got me gone
Slow grindin'
Longer that it takes the more it grows, you gotta go
Slow grindin' yeah
Better when it's slow you gotta know you got me gone
Slow grindin'
You know what it takes
Slow
Slow

Sometimes I look back at my past I got amnesia
To think that we done made it outta
Happy meals and little caesars pizza
We were scraping up for dimes didn't have a dollar on the visa
Numb to the pain the Henny was my anesthesia
Real shit
I'm the poster child for follow your dreams
Even with the ups and downs and all the shit in between
Lost so many ones I thought was supposed to be here with me
And to the ones who thought I wouldn't be anything

We was just slow grindin', yeah
Better when it's slow you gotta know you got me gone
Slow grindin'
Longer that it takes the more it grows, you gotta go
Slow grindin' yeah
Better when it's slow you gotta know you got me gone
Slow grindin'
You know what it takes
Slow
Slow
