

We've been waiting for little sister
With roses in our garden
Then like magic, you appeared
In our hearts, the healing started

Moonlight
You shine bright

All at once
You're what our dreams are made of
Wrapped up in love
With a little faith and trust and pixie dust

You turn the light on, in the dark
And it sparkles when I hold ya
There's a story, in your name
That I'll tell you when you're older

Moonlight
You shine bright

All at once
You're what our dreams are made of
Wrapped up in love
With a little faith and trust and pixie dust

Pixie dust
Pixie dust

All at once
You're what our dreams are made of
Wrapped up in love
With a little faith and trust and pixie dust
