

No Road is the Right Road

Christine McVie

No road is the right road
So I've got to change my plan
You're walking up a one way street
When you only love one man

I loved you and listened to you
Every word you said
I didn't even notice
When the lights were changing to red

Well the months go by and I try
To keep up with the green
But it sure becomes a problem
When I'm wanting to give in

I knew you had to go away

I really understood
And I understand that you love me baby
And that makes me feel so good

Well the months go by and I try
To keep up with the green
But it sure becomes a problem
When I'm wanting to give in

I knew you had to go away
I really understood
And I understand that you love me baby
And that makes me feel so good
