

# Healed

Christophe Willem

Can't seem to find the thoughts to comfort me  
I wished I hoped I prayed for some release  
As night and day, and day and night, go by  
I crave a touch to make me feel alive  
Now, something in your eyes  
Wakes me from my sleep  
You're reach inside of me

And I wanna heal, when you're here, cause to me  
When you're near  
I wanna heal heal  
I can't believe  
That you're here by my side  
And I will heal

I found a place to store away the hurt  
And wish away the world for all it's worth  
It's hard to find the beauty in this mess  
I tried the best I could but there's nothing left  
Now, something in your smile  
Gives me hope to dream  
And you reach inside of me

And I wanna heal, when you're here, cause to me  
When you're near  
I wanna heal heal  
I can't believe  
That you're here by my side  
And I will heal

You, sweep aside my tear  
Whisper in my ear, delicately  
You're strength to me

I wanna heal  
I wanna heal  
I can't believe  
That you're here by my side  
And I will heal
