

Safe and Sound

Christophe Willem

I'm in a tunnel
I need a vision
It's only darkness
I'm feeling lost

So will you take take take take take my hand
And led me out into the stars
Cause, I know your in the distance
I hear you in the silence now

Find me, free me
Put my feet on the path that leads home
I need guidance
I'm nothing but a broken heartache
I need you to show me where to start
To erase all these scars?
Hold me, lay my head down
'Till I'm safe and sound
'Till I'm safe and sound

I'm just a soldier
I've lost my armor
I'm feeling fractured
And all alone
So talk talk talk talk talk to me
And show me that you wanna know
Cause I'm standing on the edge now
And it looks a long way down

Find me, free me
Put my feet on the path that leads home
I need guidance
I'm nothing but a broken heartache
I need you to show me where to start
To erase all these scars?
Hold me, lay my head down
'Till I'm safe and sound
'Till I'm safe and sound

Feeling like I'm running
Feeling like I'm headed
Somewhere warm, I have known
Feeling like I'm letting let my fear just take me there
Cause I'm nowhere

Find me, free me
Put my feet on the path that leads home
I need guidance
I'm nothing but a broken hearted
Are you to show me where to start
To erase all these scars?
Hold me, lay my head down
'Till I'm safe and sound
'Till I'm safe and sound
'Till I'm safe and sound
