

Do you feel, liberated?  
When you're gonna burn at night, I like what I see  
And the feelings been masquerading  
Oh, I feel it now it's time to set us free

It's why I'm here, finally  
To be myself, naturally  
Everything that I had before was over-rated

Whatcha giving me is starlight, starlight  
Brighter days are here in my life, my life  
The devils journey and my world it just gets better  
I found somebody who can make me shine

Cause all we'll be anticipating  
So much better than I thought it could be  
And the feelings are, syncopated  
With each other is where I wanna be

When you're here, I can't speak  
I get nervous, I feel weak  
Everything that I had before was over-rated

Whatcha giving me is starlight starlight  
Brighter days are here in my life, my life  
The devils journey and my world it just gets better  
I found somebody who can make me shine  
Starlight

A'int nobody, loves me better  
Makes me happy, makes me feel this way  
A'int nobody, loves me better  
Makes me happy, makes me feel this way

First you put your arms around me  
Then I feel your charms around me  
I got this feeling most would treasure  
And a love so sweet, we cannot measure

It's why I'm here finally  
To be myself naturally  
Everything that I had before was over-rated

Whatcha giving me is starlight starlight  
Brighter days are here in my life, my life  
The devils journey and my world it just gets better  
I found somebody who can make me shine  
Starlight

Do you love me better?  
Makes me shine shine shine  
Ohh, finally I found someone who can make me shine  
Starlight

I found somebody who can make me shine  
Starlight!
