

# She Told Me So

Christopher Cross

We all know how the story begins  
How we fall so easily in  
To love  
Then a boy breaks a girl's heart  
A girl breaks a boy's heart  
Goodbye is a very hard word to forget  
But I think I finally met  
The girl  
To take away those yesterdays

Oh she loves me, she told me so  
As a tear came to her eye  
And I love her, I will, I know  
Love her for the rest of my life

Once more I'm feeling like I'm out of control  
Cause the girl's got a serious hold  
On me  
And part of me says run away  
But I wanna stay  
Should I be up front or cool  
Which way is playing the fool  
The only time I know what's right  
Is when I hear her telling me

Somewhere there's a star in the sky of every night  
Shining for the love of hearts  
The light of that star, like the hand of a friend  
Leading me back to love again

If you love her let her know  
Let her see all the secrets in your heart  
If she loves you she'll only love you more  
As she find out who you are
