

Light the Love

Christopher Dallman

There's something in the air
in the leaves on the ground
rustling, rustling
you know you've got a fire
baby, light it up
oh, light it up

I forgot that the sea was watching me
Let this old heart beat tonight
oh, light it up
Light it up

You know all that you need is a fire
to light the love
You know all that you need is a fire
to light the love
light the love

It used to be simple
strike, spark, and flame
Now you feel
you've got to burn your name
oh, light it up
light it up

You know all that you need is a fire
to light the love
You know all that you need is a fire
to light the love
light the love

Some days I come alive
Blood is moving
And my gears stay in drive
Blood is moving
Come alive, come alive
Blood is moving
Come alive, come alive
Blood is moving

There's something in the air
in the leaves on the ground
rustling, rustling
you know you've got a fire
Light it up
Oh, light it up
Oh, light it up
light
it
up
