

A dark force that is taking over  
Some bad news that will change your mind  
You gotta talk but you take the crowbar  
I've seen it all and I know the truth know  
Tell me your lies, I'm done with you  
You just treated everybody somehow  
I won't be what you want me to

And again I'm on the run  
I know what you all came for  
You wanna see me falling down  
And treat me once again  
So I'm reaching for the sun  
I know just what you came for  
It's time to let you down again  
And kill the agony

A dark sky that is coming closer  
A bad taste that is on your tongue  
Is that everything you ever wanted  
A dark force that is taking over  
Some bad news that will change your mind  
You gotta talk but you take the crowbar  
Solutions are really hard to find

And again I'm on the run  
I know what you all came for  
You wanna see me falling down  
And treat me once again  
So I'm reaching for the sun  
I know just what you came for  
It's time to let you down again  
And kill the agony

And again I'm on the run  
I know what you all came for  
You wanna see me falling down  
And treat me once again  
So I'm reaching for the sun  
I know just what you came for  
It's time to let you down again  
And kill the agony

And again I'm on the run  
I know what you all came for  
You wanna see me falling down  
And treat me once again  
So I'm reaching for the sun  
I know just what you came for  
It's time to let you down again  
And kill the agony

I know just what you came for
