

## Blame You

CHROM

Get a thrill, your last will  
I'm not awake, it's time for a break  
Your standing tall upon the wall  
The chance to choose, but there's no use

You could do what I do  
I'm walking right beside you  
Realizing my view  
Even if you don't want to

I tried to complain you  
I tried to hate you  
This time it will never be the same  
And I tried to blame you  
I tried to shame you  
You'll never remember me again

A life so cruel, a world to rule  
You must behave cause you're the slave  
It's time to go, that's all I know  
You've got to be, don't wait for me

You could do what I do  
I'm walking right beside you
