

# I Don't Believe

CHROM

This is no dream this is no lie  
It's just the truth about this time  
And all the things that we should know

Nobody cares about the weak  
But everybody loves the freak  
The more you speak the less you show  
And this world makes me sad

Truly I could make things right  
And change all the things now in my life  
But I don't  
I don't believe in you  
Would you step into the light  
And show your effort to save a life  
But I don't  
I don't believe in you

Some people try to escape the war  
Some people just try to ignore  
And everybody knows the truth

So don't be scared just for today  
And try to walk another way  
It's time to show compassion now  
Not only in your head  
This world makes me sad

Truly I could make things right  
And change all the things now in my life  
But I don't  
I don't believe in you  
Would you step into the light  
And show your effort to save a life  
But I don't  
I don't believe in you  
Truly I could make things right  
And change all the things now in my life  
But I don't  
I don't believe in you  
Would you step into the light  
And show your effort to save a life  
But I don't  
I don't believe in you
