

# We'll Be Alone

CHROM

What if we could reach the dark-side  
What if we could leave reality  
Would you like to be the lonely  
Would you except your destiny  
This is the time to lose your  
To lose your doubts and your regrets  
... and all your suffer

Some say that we are different  
Some say we don't belong here  
... and I agree

With every breathe we take  
Our life is fading  
All the mistakes we made  
Just let us grow together

We could go through the fire  
We could do anything at all  
Just leave this place behind us  
And write these letters on the wall

A place where we can be free  
A place that we will call our home  
Where we will stay and don't care  
About the time we'll be alone  
... at the end we'll be alone

Ready for some inspiration  
Ready for the new world, take my hand  
... and you will understand  
Don't worry, don't you fear now  
We're strong and side by side we stand  
... in a foreign land
