

Jealous (I Ain't With It)

Chromeo

I got strung up from our loving
I wish you cared to see
But she only cares when she's got the time
And I fret so much about our loving
I wish she'd let me be
But our destiny's got us intertwined

And is it really my fault
I get a shiver when I see you with those other guys
Wearing the jacket I bought
I can't help but lose my temper and I don't know why

I get jealous, but I'm too cool to admit it
When the fellas, talk to my girl I ain't with it
I get jealous, but I'm too cool to admit it
When the fellas, talk to my girl I ain't with it
I ain't with it, I ain't with it,
I ain't with it, I ain't with it

What is she thinking, too much uncertainty
Why can't she give some sort of sign
You know and I know, a thing or two about loyalty
Ooh, but that girl don't pay no mind

I get strung up from her loving
I wish she cared to see
But she only cares when she so inclined
And I fret so much about her loving
I wish she'd let me be
But her destiny/s got us so intertwined
Back in 2011, I decided
To not let this play with my mind
But when the boys from out of town
They come back around
I feel like committing a crime, yeah
