

Come Correct

Chronic Future

Oooooohhhhhh it's exciting never
Biting but busy reciting
For the next concert enlightening
The writing that's occurring
Burring because it's 360 degrees
Below the hypotenuse
I called a truce but now I'm living
It no more getting lit for a little bit
There seems to be a void but
Everything resides inside of it
All my thoughts travel faster than space ships
Longer than the plane trip

SO you know we'll go down
If we don't take a look around

Disappearing/reappearing humans fearing
The light at the end of the tunnel's
In the rearview mirror and
Some of my peers are stuck up at the tollbooth
They're agitated with life like it's a loose tooth
Ruthless behavior never did save you
In a sticky situation
Now something else is racing other than my heart
I guess I'll pull another item right out of the cart
So let me stop like this

We're gonna go down
If we don't take a look around

We're the Chronic Future and
We're coming correct son
Helping fill you life with daily illusion
We're both livin' in this institution
With no introduction you think I'm pollution

You debated over the topics you can't
Top this that's why you should stop this
Given the current jurisdiction laughter's
In the pocket
Of the beholder with the friction
Comes fiction that's older
Than the boulder weighing down
The habits on your shoulder
But it's old now that's true fact
The new news to you is that
You lose nothing something coming up
And you're giving it slack
But that's wack but tha's that
And that's what oyu chose
You got too short of a fuse
So you lose and go down

Do watcha say everyday
And even though I portray
Who I am's not good enough for you
Startin' to make us stay like glue

I'm coming in back with the track
Stepping it up we on attack
Never do lack what you need but you
Grab with you greed
So you know we will proceed

To go down
If we don't take a look around
