

## Be with You

Chumbawamba

The future glints like the moon on an old slate roof  
And everything you say sounds like the truth  
The things you did made half my dreams come true  
And I wanted to be with you  
And I wanted to be with you

Sing your songs of what could be  
Of all the things you brought back home to me

And I wonder what the papers are going to say  
Another actress, another war, another day  
But everything's changed, the world woke up today  
And I wanted to be with you  
And I wanted to be with you

Sing your songs of what could be  
Draw the world for those who couldn't see

And I wanted to be with you
