Chxrlotte

Angel, tell me why
Was I imagining the love
That I was sure was in your eyes?
I told you "come with me"
But you left me in the silence
Where the nightingales should be

Angel
God it's painful
To love you like I do

I just wanted you
Can you look me in the eyes
And tell me this is what you want to do
Forever feels so long
But if I'm not enough to love you
I don't feel like I belong

Angel
God it's painful
To love you like I do

But how did I think you'd be able
To ever love a fallen angel
All I ever wanted was to be enough
And I don't want you to forgive me
I'm only happy when you're with me
We could've left it all behind for good and run

We could've been us
We could've been us
We could've been us

I can't bear to see the end
An eternity I'd like to spend
With the only one who ever cared

We could've been us
Felt like I was falling from above
Maybe I was just falling in love
Who am I to think I'd be enough
We could've been us
We could've been us
