

Follow You Down

Ciaran Lavery

I wake up late
Pick myself off the floor
I get nothing from this
I haven't had before
You can wrap it up good
Deliver in my hand
Baby I need you more than I can understand
The feeling is warm
You're ready to go
Now but don't race away because I get so slow
With this type of promise only talk with my hands
Becasue I'm nervous can't you understand

Oh to be standing still a shadow on the light
Oh maybe you should pass and cast a stone down
So let me follow you down
I'm so hopelessly out
And hopefully into your cloud
So let me follow you down follow you down

I go to bed late
And before I retire
I hold on to my own, protect it like a fire
I can wrap it up good
Deliver in my hand
Baby you need me more than you can understand

Oh to be standing still a shadow on the light
Oh maybe you should pass and cast a stone down
So let me follow you down
I'm so hopelessly out
And hopefully into your cloud
So let me follow you down follow you down, follow you down
I'm so hopelessly out
And hopefully into your cloud
So let me follow you down, follow you down

Oh to be standing still a shadow on the light
Oh maybe you should pass and cast a stone down
So let me follow you down
I'm so hopelessly out
And hopefully into your cloud
So let me follow you down follow you down, follow you down
