

# Our Brand New World

Cilla Black

I see you now, the way you look, the way you said "Hello"  
I hear you now, you took my hand and said "Come on, let's go"  
Into a world, a world so full of love and so brand-new  
A world with no one there but me and you

I never knew how much my life could change in just one day  
But meeting you has changed my life in oh so many ways  
I found a world with sunshine all the way  
And in this world my love for you grows stronger every day

A brand-new world brought us together, just a boy and a girl  
No one will ever really know what goes on inside our world  
A brand-  
new world is full of everything that's good in this world  
And everything I ever do from now on I do for you

Now, as the time goes drifting by I look and find you there  
I know you're mine and from now on there's nothing we can't share  
Our brand-new world is everything I dreamed a world should be  
A paradise of love for you and me

A brand-new world brought us together, just a boy and a girl  
No one will ever really know what goes on inside our world  
A brand-  
new world is full of everything that's good in this world  
And everything I ever do from now on I do for you, for you
