

Through the Years

Cilla Black

Do you remember
How it started way back then?
There were love songs on the radio
And music became a friend

Who'd have believed it?
But the melodies linger on
They gave us inspiration
And kept us going on

They said that all you need is love (all you need is love)
Now we remember yesterday (yesterday)
The message was in the songs
And the feelings were so strong
They sounded good - they still sound good today

Through the years we dreamed our dreams together
We hoped and prayed and some of them came true
Through the years our memories live forever
And like the music, we made it strong

Do you remember fairy tales? (fairy tales)
The hero reaches for his queen
Whatever your hopes and fears
Your laughter and your tears
The feelings just get stronger through the years

Ohh

Through the years we dreamed our dreams together
We hoped and prayed and some of them came true
Through the years our memories live forever
And like the music, we made it strong

Through the years

Through the years we dreamed our dreams together
We hoped and prayed and some of them came true
Through the years our memories live forever
And like the music, we made it strong

Through the years
