## **Heartbreak Station**

Waiting at the station Tears filling up my eyes Sometimes the pain you hide Burns like a fire inside

Look out my window Sometimes it's hard to see The things you want in life Come and go so easily

She took the last train out of my heart She took the last train And now I think I'll make a brand new start She took the last train out of my heart

Watching the days go by Thinking 'bout the plans we made The days turn into years Funny how they fade away

Sometimes I think of those days Sometimes I just hide away Waiting on that 9:20 train Waiting on a memory

She took the last train out of my heart She took the last train And now I think I'll make a brand new start She took the last train out of my heart

My lady's on the fly And she's never coming back My love is like a steam train Rolling down the tracks yeah, yeah

She took the last train out of my heart She took the last train And now I think I'll make a brand new start She took the last train out of my heart

She took the last train, out of my heart She took the last train And now I think I'll make a new start Last train out of my heart
