

# Electric City

Circa Waves

I think I'm hypnotised by a screen  
I'm so enveloped in my dreams  
Watching tutorials all alone  
My head's in space but I'm at home

Every now and then  
The fear comes

In this electric city  
We living a sin  
In this electric city  
We always plugged in  
And in and in  
And we sing

We're all trying to love  
In this electric city  
Hey hey

So controversial on a Monday  
But no one remembers by the time once it's Sunday  
Another news feed full of fear  
We're all alone, wish you were here

And every now and then  
The fear comes

In this electric city  
We living a sin  
In this electric city  
We always plugged in  
And in and in  
And we sing

We're all trying to love  
In this electric city  
Hey hey

We're all trying to love  
We're all trying to love

In this electric city  
We living a sin  
In this electric city  
We always plugged in  
And in and in and in
