

Motorcade

Circa Waves

Stay now
To witness it, to witness it
The final stroke
I love you more, I love you more
You hear it turn
Friends of yours are friends of mine
The silver line, the circle of us all

Terrified
Terrified, I'm not [?]
Get to me
Another day just fell away
So try an try
To make a list before I die
And finish it
Will I finish it? Will I finish it?

From the back of the motorcade
I fell in love, I lost my way
I'm begging someone to make you stay
Please make you stay
'Cause only you could ease my mind
Only you could ease my mind

Now I lie
Now I lie awake at night
Thinking why
No one's like me
Am I in the wrong?
Or am I right, or am I right?
Am I right, oh am I right?

From the back of the motorcade
I fell in love, I lost my way
I'm begging someone to make you stay
Please make you stay
'Cause only you could ease my mind

From the back of the motorcare
I fell in love, I fell in love
From the back of the motorcare
I fell in love, I fell in love

From the back of the motorcade
I fell in love, I lost my way
I'm begging someone to make you stay
Please make you stay
'Cause only you could ease my mind
Only you could ease my mind
Only you could ease my mind
