

Round Again

Circulatory System

Have we come round
Have we come round again?
Have we come round
Have we come round again?

If you need a little song to help you move along into the next
Verse or two or three

Of course we'll come round
We always come round again
We'll go around
We'll come back round again

When you need a little song to help you move along into the next
World or two or three
If you think it's been a long long time

The meaning will come

The falling molecules that make this world are quickly changing course
Of course you've seen everyone just comes around and comes right back again
Several time frames have been ignored, we brought them back to see and hear
And here we go round our world in circles just like you knew that we would

It's way out there somewhere not far away
It's way out there somewhere not far away

Do you think we can lift this shadow?
Do you think, do you think, do you think at all?
Do you think we can lift this shadow?
Do you think, do you think, do you think at all?

Because it's way out there somewhere not far away
It's way out there somewhere not far away

Do you think we can lift this shadow?
Do you think, do you think, do you think at all?
Do you think we can lift this shadow?
Do you think, do you think, do you think at all?

Because it's way out there somewhere not far away
It's way out there somewhere not far away

It's very far away, very far away
We've been there too
It's very far away, very far away
We've been there too
We've been there too
(Don't stop)

Don't think of right side up or up and down
'Cause it comes back around
To the circle relived
To the circle relived

If you think of right side up or up and down
'Cause it comes back around

To the circle relived
To the circle relived

It's very far away, very far away
We've been there too
We've been there too
It's very far away, very far away
We've been there too
We've been there too
