

Active Ingredients

Citizen Fish

The will to respond when the chase is on
Sends people up trees cos when they're gone
The carbon dioxide in the air
Will put a sweat on the polar bears
The ice will melt and we'll feel the freeze
Of freshwater currents in the northern seas
Then the population expands to squeeze
Between frozen wasted and the overheated shade
Will it be man made
This recipe for disaster?
Have we a part to play
In this recipe for disaster
This recipe for disaster
The need to be fed cos if you're not you're dead
Gave us the chemical safety net
Now as we scan the ingredients
We're back in the classroom feeling dense
Then lists get made and facts displayed
That tell us what's behind the names
Sedation and addiction on to
Staying alive on processed food chains
Will it be man made
This recipe for disaster?
There's human brains
In this recipe for disaster?
This recipe for disaster
The desire to resist when nature's twisted
Animal/Human rights restricted
Leads to people who won't be led
By the streamlining in their heads
Linking up to a new perspective
It's a chain reaction cause and effective
It's happening now fast not slow
Active ingredients go go go!
It's happening now fast not slow
It's happening now fast not slow
It's happening now fast not slow
Active ingredients go go go!
Now we're face to face
With a recipe for disaster
Have we something to say
In this recipe for disaster?
Is there a difference made
To this recipe for disaster?
Have we a part to play
In this recipe for disaster?
It depends what part you're after
Go go go!
