

How many lights can you count?
Ethereal to your memory
How many dives into
The water until you're feeling clean?

Have you waited long enough?
Have you waited long enough?
Have you waited long enough?
Have you waited long enough?

Have you waited long enough?

Through me I've become wishful
The people dance around the riverbank
The way they stare reminds you to bleed
Through me I've become simple
The shadows crowd around to tell you
That the heaven you live for is nothing

How many voices are around
That drown your own melody?
A family for hire
We're never where we thought we'd be

Have you waited long enough?
Swallow a pill for your loss
Have you waited long enough?
Medicine pulls me from your love

Have you waited long enough?

Through me I've become wishful
The people dance around the riverbank
The way they stare reminds you to bleed
Through me I've become simple
The shadows crowd around to tell you
That the heaven you live for is nothing

Through me I've become wishful
The people dance around the riverbank
The way they stare reminds you to bleed
Through me I've become simple
The shadows crowd around to tell you
That the heaven you live for is nothing

Have you waited long enough?
Have you waited long enough?
Have you waited long enough?
Have you waited long enough?
