

Without Warning

City and Colour

Did someone say that this would be easy?
Did they proclaim this too shall pass?
One thing I know you learn for certain
Is that the good times, they never last

But darling, you know I ain't got the answers
But I sure as hell won't surrender
It's gonna be you and me 'til the end of time

Though we lost it all without warning
After dark always comes morning
You know we can make it one more night

Did someone say that you deserve better?
Do you believe this world owes you more?
Sometimes in life you gotta work a little harder
Before you let the love walk out the door

But darling, you know I ain't got the answers
But I sure as hell won't surrender
It's gonna be you and me 'til the end of time

Though we lost it all without warning
After dark always comes morning
You know we can make it one more night

You always wanted a love song
Well now I'm singing you one
Does it sound like the one in your dreams?

You see I know we are strong enough
To carry the weight of this love
Sometimes things just are not meant to be

But darling, you know I ain't got the answers
But I sure as hell won't surrender
It's gonna be you and me 'til the end of time

Though we lost it all without warning
After dark always comes morning
You know we can make it one more night
So hold on tight
