

## Everyday

CIV

You wasted my time and you've taken my talk  
Tried stealin' my life, you tried for so long  
Was it something I ate or was it something that I caught and I  
hear that it's something that is going around, going around  
They told me about the tricks of the trade  
They sold me empty promises made  
Mistakes were made - more than a few  
I learned from them now what else can I do

Everyday, everyday I will answer for myself and everyday I look  
to you,  
It's always something new  
Everyday, everyday I will answer for myself and everyday I look  
to you, can you help me see it through

It felt like I died when I started to change  
Thought I was on your side  
But you were so wrong and now I realize that I'm not in it alon  
e and I hear that it's something that is going around, going ar  
ound  
I think about the prices I paid, for compromises never made  
Apologies - I have none for you  
I'm living for me and that's the only thing I can do

Everyday, everyday I will answer for myself and everyday I look  
to you, it's always something new  
Everyday, everyday I will answer for myself and everyday I look  
to you, can you help me see it through
