

# Take Me Away

Civet

I've seen your blood sweat and tears  
Feels like I've known you for years and years  
What I have it ain't enough to give  
You want it all honey, you just want to live

[Chorus:]

Take, take me away, show me your blood  
and give me all your pain  
Don't tell me no, cause I've had you before  
Darts and daggers leave me on the floor

Use your pity to travel the world  
It got you fame, but it lost you your girl  
He's no God and I'm no saint  
Get outta hell before it's too late

When you're down, on you're knees  
You'll be begging, baby please  
You've got one chance, to be with me  
Break my heart  
And that's the last you'll ever see

You had me first but I don't belong to you  
Don't leave me lovesick, hopeless and confused  
You're the same and you know it's true
