

## Fire Escape

Civil Twilight

We are the desperate ones looking for the mark  
We are the lonely ones left out here in the dark  
We bought our tickets but we don't have a seat  
And now we are just slaves to the beat  
We are the tired ones tired of too much sleep  
Tired of searching for the words we can't repeat  
Don't mean to scare you but it's getting too warm  
I think I'm gonna move to the door

You see, we are burning,  
This is real  
We're on fire but we can't feel a thing  
We were promised more than we can take  
Everybody out the fire escape

Oh oh oh oh

Gather around my friends  
Let's try not to pretend  
There is a war between the cold out there and the fire within  
I know that we're alive, I know that we can dive  
Right into the thick of it

You see, we are burning,  
This is real  
We are on fire but we can not feel a thing  
We were promised more than we can take  
Everybody out the fire escape

I don't wanna fill my body  
With drugs I can't even name  
I'm tired of feeling the same  
I wanna feel something

You see, we are burning,  
This is real  
We're on fire don't you feel  
We were made to be more than inches away  
Everybody out the fire escape

You see, we are burning,  
This is real  
We are on fire but we can not feel a thing  
We were promised more than we can take  
Everybody out the fire escape
