

## Let It Go

Civil Twilight

Sleep like a lion under cover warm  
With the fury lying in your bones  
Doubt is the warmth inside your coldest thought  
Fear is the rope that drags you down  
Just let it go  
Just let it go

First of the first of the first son  
Born on the night of a winter storm  
The weight that you've carried for so long  
It has made you tired, but it hasn't made you strong  
Just let it go  
Just let it go

Let it go, like I know you can, like I know you will  
Let it fall, like the crumbling walls of Jericho  
Let it go, let it go...

Let the wind pass through your fingers  
And trying reaching out for me

Let it go, like the falling leaves of Babylon  
Let it go, like I know you will, like I know you can  
Come on man  
Let it go  
Let it go  
Let it go  
Let it go  
Let it go...

Let it go  
Let it go  
Let it go
