

Take It

CJ FLY

I just wanna know your limitations
Take my time you know I'm super patient
Baby let me know if you could take it

I just wanna know your limitations
Take my time you know I'm super patient
Baby let me know if you could take it

I just wanna know your limitations
I could tell by all the hesitation
Maybe you don't know if you could take it

Think its time that we get reacquainted
Been of while I see you getting naked
Got you wet I know that been waiting
Body out this world don't need a spaceship
Said I hit her spot and started shaking
When we met she said that she was taken
Leave that clown you know you too complacent
Know that he don't ever take you places
He don't even treat you right
Why you waste your time with him when you could with me be tonight
You know he don't beat it right
All you gotta do is say the word then I'll get you a flight
She ain't ever showed me this side
Open sesame let me inside
Just surrender you don't need to fight
Everything is gonna alright
Shorty told me that nobody ever hit it like this
Toes be curling, and her eyes be rolling in her eye lids
Got her bitten her lip
She riding that shit
We be going so damn hard
I think the condom might rip
Get inside of her ribs
She be tight when I dip
Swear I love it when she do that nasty shit with her spit
She might swallow my kids
Let slide of her chin
I ain't think that she could do it she deepthroat the whole thing

I just wanna know your limitations
Take my time you know I'm super patient
Baby let me know if you could take it

I just wanna know your limitations
Take my time you know I'm super patient
Baby let me know if you could take it

I just wanna know your limitations
Take my time you know I'm super patient
Baby let me know if you could take it

I just wanna know your limitations
I could tell by all the hesitation
Maybe you don't know if you could take it
