## Shippensburg

You know what makes me happy The things that make you sad The feel that I controls absorbed by the radio jag I found my indecision

The product of the media grime The feel that I control have you press rewind

And now I'm on the wings Hoping that you'll hear Don't bother to respond You love to hear me again

And when the sun beams down all of your lies Close, close, yeah close the light

The sky's all grey in the barracks I know I'm a lousy hero The classic i can feel is that of a memory And you are peering down through parascopic eyes Close, close, yeah close (conscience)

I try to hide the fact that I'm afraid We'll drive the band to Shippensberg And hope that we get played

And in the end of a season The voices turn it all off The things that were so meaningless 'Til the next one comes along

I try to hide the fact that I'm afraid We'll drive the band to Shippensberg And hope that we get played
