Cherry

Been around long enough to know what I like  
Yeah, I only trust myself - just me, myself and I  
Everyone's alone in the twilight  
Handle on my back find the light

Even in my darkest hour make it look so casual  
Cast a spell lalala that's magical  
Unbelievable things blind me  
Got lost in touch with the pretty views of me, myself and I

Hand on my chest I'm flying  
No one can see what I can see  
There's only one and me in this world

I can tie a cherry  
Look, I got a gold tongue  
The chemistry in this body  
Supervision open your eyes  
I shoot for the stars  
Razzi shot I'm the target, ya

Cherry - spitting fire for fun  
Ain't ordinary the way it all revolves  
I shoot for the stars  
Razzi shot I'm the target, ya

Watch me, watch me, watch me tie a cherry

I walk a winding path, solo  
The voices spinning in my head, keep it low  
They be tattooed on me like logo  
Why you always mad  
Chill it down now

Hand on my chest I'm flying  
No one can see what I can see  
There's only one and me in this world
