

# Slow Dance

Clairo

Da-dum, da-dum, da-dum, da-dum

When the moon begins to hide  
It's not over  
In the window, turning light  
Does not mean goodbye

And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to  
And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to

What is it? That's keeping one foot out  
And the other crawling in bed  
And what is it? That's keeping you alone  
And leaving after we slow dance

And we fall back in routine  
It can't be over  
And I remember everything  
You used to know her  
I could  
Trace it all the way back, I could  
Trace it all the way back

And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to  
And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to

What is it? That's keeping one foot out  
And the other crawling in bed  
And what is it? That's keeping you alone  
And leaving after we slow dance

And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to  
And too  
When candles burn out and the  
Record has faded down I know  
You've got people to turn to
