

My Night

Clapton

When I let you down
Did I change your whole life?
'Cause I really tried
When I let you down
Did I change your whole life?
'Cause I really tried

We've got the same words
We've got the same name
Oh no, was tryin' to change
We live the same life
We've got the same name
Oh no, was tryin' to change

Mess up my night
Don't know what's right
I will keep on holding
Till you speak to me alright
Mess up my night
Don't know what's right
Ah, laughing like you don't know him
Even though you know that he's mine

When I let you down
Did I change your whole life?
'Cause I really tried
When I let you down
Did I change your whole life?
'Cause I really tried

I want you to know
That the feelings are true
I believe in the things
That you say and you do
I want you to know
That I'd live in your mind
Some reasons to give you
It's better without your kind

Mess up my night
Don't know what's right
I will keep on holding
Till you speak to me alright
Mess up my night
Don't know what's right
Ah, laughing like you don't know him
Even though you know that he's mine

Mess up my night
Life's all changing just believe me so
I keep thinking why you won't let go

Mess up my night
I can't think about you one more time
Everybody, it's better without your love

Mess up my night

Don't know what's right
I will keep on holding
Till you speak to me alright
Mess up my night
Don't know what's right
Ah, laughing like you don't know him
Even though you know that he's mine
