

# Wildside

Clapton

I see an ocean of green  
When you look into my eyes  
Make it so I'll never leave  
When you wake up on the wildside

I've really come around to you  
I've really come around to you  
Do anything you want me to  
I've really come around to you

You've got a hold on me  
I feel your body taking over me  
The kinda crazy like an enemy  
You lock me up so there's no way out  
When your love comes down  
You've got a hold on me  
I feel your body taking over me  
The kinda crazy like an enemy  
You lock me up so there's no way out  
When your love comes down

I see an ocean of green  
What a sight for my sore eyes  
Empty emotionally  
So wake me up on the wildside

I've really come around to you  
I've really come around to you  
Do anything you want me to  
I've really come around to you

You've got a hold on me  
I feel your body taking over me  
The kinda crazy like an enemy  
You lock me up so there's no way out  
When your love comes down  
You've got a hold on me  
I feel your body taking over me  
The kinda crazy like an enemy  
You lock me up so there's no way out  
When your love comes down
