Midnight

Classics IV

When the sun comes up in the mornin'
Till the shadows start to fade
I think about a midnight long ago
I remember midnight kisses and the magic of a smile
And the midnight moon above like it used a crown

(Ooh Midnight, ooh Midnight)
My days are lonely without you

It was 12 o'clock when I met her, and her hair was raven black
So I used to call her Midnight just for fun
We were laughing through the darkness, making wishes on a star
And every wish came true except for one

(Ooh Midnight, ooh Midnight)
My days are lonely without you

(Ooh Midnight, ooh Midnight)
My days are lonely without you
And now I'm always midnight blue
