

Across The Universe

Claude Kelly

When it feels this right
It's impossible to hold it inside
And I write a melody every night
That's how much your loving inspires

You got me on lock down, lock down, lock down
I don't even care now, care now, care now
I want the whole world to, world to, world to
To know that I'm yours now, and you're mine

I wanna take you everywhere
'Cause baby girl I really don't care
If everybody knows what we do
I just wanna make love to you
Across the universe
Wanna make love to ya
Across the universe
Spread this love
Across the universe
I wanna make love to ya
Across the universe
Spread this love

When you get goose bumps
Each and every time you touch
It's worth giving everything else up
And girl that how you got me sprung

Oh you got me on lock down, lock down, lock down
I don't even care now, care now, care now
I want the whole world to, world to, world to
To know that I'm yours now, and you're mine

I wanna take you everywhere
'Cause baby girl I really don't care
If everybody knows what we do
I just wanna make love to you
Across the universe
Wanna make love to ya
Across the universe
Spread this love
Across the universe
I wanna make love to ya
Across the universe
Spread this love
Across the universe

Never been this confident before
Bout love, ohh no
But when I'm with you girl, I feel so sure
You're the one, so let's make love

I wanna take you everywhere
'Cause baby girl I really don't care
If everybody knows what we do
I just wanna make love to you
Across the universe

Wanna make love to ya
Across the universe
Spread this love
Across the universe
I wanna make love to ya
Across the universe
Spread this love

I wanna take you everywhere
'Cause baby girl I really don't care
If everybody knows what we do
I just wanna make love to you
Across the universe
Wanna make love to ya
Across the universe
Spread this love
Across the universe
I wanna make love to ya
Across the universe
Spread this love
Across the universe
