

# Right Now

Clay Walker

We could keep texting all night on the telephone  
Keep on pretending like we're not alone  
We could lock down the plans about seeing that cover band playing on Friday night  
But all that waiting 'round  
Just to see you later now  
Seems like a waste of time

Gotta see you right now, right now  
Don't waste another minute  
Start your car and get on in it  
Right now, right now  
And head on straight to me  
I want to see headlights turning in my drive  
Girl it won't take you no time  
You wouldn't believe just, how much I need ya  
I gotta see ya  
Right now

You don't need to mess around putting up your pretty hair  
You're only gonna let it fall down when you get here  
So throw on some blue jeans, any old colored tee  
Turn the key and hit the gas  
If the lights are flashing too much, baby find a shortcut  
Anything to get you here fast

Girl I need you right now, right now  
Don't waste another minute  
Start your car and get on in it  
Right now, right now  
And head on straight to me  
I want to see headlights turning in my drive  
Girl it won't take you no time  
You wouldn't believe just, how much I need ya  
I gotta see ya  
Right now

We can get a little moonlight shining through the windows  
Spin a little vinyl, dance a little too slow  
Stay on the line so I know that you're getting close

Girl I need you right now, right now  
Don't waste another minute  
Right now, right now  
And head on straight to me  
I want to see headlights turning in my drive  
Girl it won't take you no time  
You wouldn't believe just how much I need ya  
I gotta see ya, right now.

Girl I need you right now.
