

# She Takes A Pill

Clean Cut Kid

Each time her hair gets wet  
It likes to pirouette  
Along her silhouette  
And rest upon her skin  
And bolts of silver light go spiraling  
And I just hope I make the time to take it in

When she gets tired it takes all she's got to stay awake  
When she gets wired, well you can't get a word in edgeways  
When she gets sad she takes it bad but she don't complain  
And when she gets ill she take a pill to ease the pain  
And when she gets ill she take a pill to ease the pain

And when here eyes get lost  
Then pretty soon her life gets tossed aside  
And like those silver locks here mind goes spinning wild  
What kind of god would wish this on his child  
A heart that breaks and heals a thousand times

When she gets tired it takes all she's got to stay awake  
When she gets wired, well you can't get a word in edgeways  
When she gets sad she takes it bad, but she don't complain  
And when she gets ill she take a pill to ease the pain  
And when she gets ill she take a pill to ease the pain

And if she needs a shoulder she can take mine and be stronger s  
till  
Until the aching's over my girl, she takes a pill

When she gets tired it takes all she's got to stay awake  
When she gets wired, well you can't get a word in edgeways  
When she gets sad she takes it bad, but she don't complain  
And when she gets ill she take a pill to ease the pain  
And when she gets ill she take a pill to ease the pain  
And when she gets ill she take a pill to ease the pain
