

We Need You

Cleo Sol

So young, so pure
Angel, don't you ever lose yourself
In this cold, cold world
I can tell you've been broken
Lost yourself, things will change
I was lost, now I can see it
Don't lose faith

We need your heart
We need your soul
We need your strength through this cold world
We need your voice, speak your truth
We need you, we need you
We need your heart
We need your soul
We need your strength through this cold world
We need your voice, speak your truth
We need you, we need you

Don't you ever run out of hope
You'll get through
(You see) Things are changing, don't be scared
Sometimes it's easier to live in fear
Don't give in, you're meant to be
Free

We need your heart
We need your soul
We need your strength through this cold world
We need your voice, speak your truth
We need you, we need you
We need your heart
We need your soul
We need your strength through this cold world
We need your voice, speak your truth
We need you, we need you

Cry, don't you cry, you got to realise
That you should fly
Cry, don't you cry, you got to realise
That you should fly
Little bee, I know you're still lost
Honey, never mind, 'cause you're still young
Don't risk it all 'cause your wing got broken
Don't run away from a life that's golden
Little bee, I know you're still lost
Honey, never mind, 'cause you're still young
Don't risk it all 'cause your wing got broken
Don't run away from a life that's golden
