

By Heart

Clever

I can teach a mouse to clasp an evil fast
One foot in and one on the gas
Leave the future in the past
As fast as you can fall
Ask my exes I done left behind
I know all the exit signs
I know you think I missed a right
But, girl, I missed a wrong
You should go before you get too close

Cause I know how to break a heart by heart
Seein you tell lies drivin off in the dark
I can tell you're ridin right out of them stars
Cross that line, take it way too far, I hate this bar
Where I dance with the tears up into your eyes
Turn a good thing right into goodbye
Baby, you should know before this starts
I know how to break a heart by heart
By heart
I know how to break a heart by heart

Hard enough to make it hurt
Leave the flowers in the dirt
I know you think we'll make it work
I tell you why I won't
Cause I'm more saddle up, then settle down
Won't take you back to mama's house
Ain't the kind of bill to live around
I would if I knew how

Cause I know how to break a heart by heart
Seein you tell lies drivin off in the dark
I can tell you're ridin right out of them stars
Cross that line, take it way too far, I hate this bar
Where I dance with the tears up into your eyes
Turn a good thing right into goodbye
Baby, you should know before this starts
I know how to break a heart by heart
By heart
I know how to break a heart by heart
I know how to break a heart by

(I know you think I missed a right)
(But, girl, I missed a wrong)

Cause I know how to break a heart by heart
Seein you tell lies drivin off in the dark
I can tell you're ridin right out of them stars
Cross that line, take it way too far, I hate this bar
Where I dance with the tears up into your eyes
Turn a good thing right into goodbye
Baby, you should know before this starts
I know how to break a heart by heart
By heart
I know how to break a heart by heart
I know how to break a heart by
