

Candlelight

Clever

Is that the woman I love? I had to ask myself
I swear the music played and she started casting spells
Well I was scared to death just to ask her for her hand
And she looked up at me and said, "I just wanna dance
Like the candle and the flame"

And I was hoping that me and you would dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down
Baby me and you we dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down

A couple years went by, she was taking my last name
A first dance, turning red in front of everybody that came
And as we moved together I swear time stood still
And I probably shoulda practiced a couple steps and turns
I was throwing it just how I feel

But baby you know that me and you we dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down
Baby me and you we dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down

But one of these days when we're old and gray
And the music starts to fade away
Baby just take my hand
Baby just take my hand

And me and you we dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down
Baby me and you we dance like candlelight
I would love just to hold your hand real tight all night long
Spin you around this whole town
Until the sun goes down
