

# Everything Beautiful

Clever

When the night falls, it's your hand in mine on the sidewalk  
You're just an angel, yeah  
Tryna find chaos, I'm the devil, wantin' peace  
I may never take a day off  
Two lovers, lost in the world, never lost one another  
So high, so high, my blood runs cold  
My love runs deep and when it all unfolds  
As long as you're in my front seat

I'll just keep my middle finger and my head high  
It's so hard to see the Heaven through my red eyes  
But as long as you're here by my bedside  
I can still see the reason I'm here  
And everything beautiful in this world

When the time calls, I'll lead you to bed with the lights off  
I see your halo, yeah  
You found me on the way down, I'm disguised as what you wish for  
When you see it, it's too late now  
Two lovers, left the world behind, nothing left one another  
So high, so high, my eyes so red  
My heart so blue and when it's time to go  
As long as I'm your go-to

I'll just keep my middle finger and my head high  
It's so hard to see Heaven through my red eyes  
But as long as you're here by my bedside  
I can still see the reason I'm here  
And everything beautiful

You're all that I need  
More than enough, by my side, high-speed  
As long as I can love and be loved here  
By the reason I breathe  
As long as you're here with me

I could keep my middle finger and my head high  
It's so hard to see the Heaven through my red eyes  
But as long as you're here by my bedside  
I can still see the reason I'm here  
And everything beautiful to me, yeah

Everything beautiful to me  
Everything beautiful
