

I Gave Up

Clever

'Cause I'm done with those that told me I'd never make it
Took my chances and they laughed in my face
I just stay focused, I've been patiently waiting
For a chance to put them all in their place

And now it's such a different tone when I walk in
I don't listen to a word when they speak
I just keep on making moves while they're talking
Let them say just what they want about me

But they will never say that I gave up
I want it all, I got my mind made up
Don't need no friends because they might change up
I let it go as soon as I blaze off
They just it'd bring me down
But those who wanna doubt me
Will never say that I gave up

They will never say that I gave up

I take my head but the money won't let me
She sings a song in my ears often sweet
I used to pray that they'd never forget me
They say my name when I walk down the street

Some people pray that I fall, cold revolver
Don't make me weed through the serpents and snakes
I will go wash your blood off my hands, holy water
I'll take your life if your life's what it takes

But they will never say that I gave up
I want it all, I got my mind made up
Don't need no friends because they might change up
I let it go as soon as I blaze off
They just it'd bring me down
But those who wanna doubt me
Will never say that I gave up
I want it all, I got my mind made up
Don't need no friends because they might change up
I let it go as soon as I blaze off
They just it'd bring me down
But those who wanna doubt me
Will never say that I gave up
