

In My Ear

Clever

It's just me and you
It's just me and you
Oh lord, oh lord

I think she forgot her smile
At the house so I gave her mine
It's not my style, it was always a waste of time
She was running wild
Life without a care, yeah
With flowers in her hair
And demons in her head
Storm in her room
We're all up in the bed and I kiss her face

I used to ask for advice, now I ask, "Where the pills at?"
Snakes in my circle left behind and they still mad
It's just me and you, it's fuck the world, I don't feel bad, no

Money was all we ever needed
Now we spend it like we never need it
Diamonds in my ear make me feel fine, make me feel fine
Money that was all we ever needed
Spend it like we never really need it
Diamonds in my ears make me feel fine, yeah

I think she forgot her smile
In the night, really makes me high
She was my style
I swear I'll never say goodbye
We were running wild
Blow it in the air
With flowers in our hair
And demons in our heads
Storm in my room
Crawl up in the bed and kiss her face

I used to ask for the world, now I ask, "Where the smoke at?"
Drugs in my system 'til I die, I can't hold back
We keep screamin', "Fuck the world" hopin' that know that, yeah

Money was all we ever needed
Now we spend it like we never need it
Diamonds in my ears make me feel fine, make me feel fine
Money's all we ever needed
Spend it like we never really need it
Diamonds in my ears make me feel fine
Diamonds in my ear

It's just me and you against the world, yeah
It's just me and you against the world
It's just me and you against the world
It's just me and you against the world
It's just me and you against the world, yeah
It's just me and you against the world
It's just me and you against the world
