

Dancing Into Nightfall

Cliff Richard

The light goes on in your eyes
It's like your heart's almost in love again
Memories jolt in your mind
That's when you remember
How we grew together

Let's go dancing into nightfall
Let's go where the open hearts go
Let's go dancing into nightfall
Together, together

One more song you can't turn down
It's like you're hearing us in stereo
You hold in close, the world falls out
That's when we remember
How we grew together

Let's go dancing into nightfall
Let's go where the open hearts go
Let's go dancing into nightfall
Go together, together

Everything I do is meant for you only
Say we'll never slow down
Keep on moving 'til it feels like we're not touching the ground
at all

Let's go dancing into nightfall
Let's go where the open hearts go
Let's go dancing into nightfall
Together, together

Let's get lost under the moonlight
For a moment forget space and time
Let's go dancing into moonlight
Together, together
